

LIGHTING

MADE IN ENGLAND

We are a luxury contemporary lighting company whose designs grace the interiors of iconic landmarks across the world. Rich materials are meticulously crafted through several processes to achieve their refined quality. These statement lights produce a warm ambient glow which sets a mood of sophistication and elegance.

With a passion for British manufacturing, CTO believe in investing in artisans and the skills that can set them apart where quality and design are a top priority. The handmade nature of our products mean that each piece is unique. There is a longevity to CTO Lights, the design and manufacturing process is never rushed, always considered and is timeless beyond trends.

Our latest collection of pendants and chandeliers have taken inspiration from the beauty of the natural world and exude a richness of texture and illumination.

Interpreted through premium materials of deep bronze, hand blown glass and satin brass, these lights glow with elegance and natural beauty.

The pendants can either be used as a singular statement light or in multiples to create a delicate display of lights that echoes the rhythmic patterns of nature and its elements. Like pebbles on the beach, clouds in the sky and gentle mountain curves.

The London Townhouse Table Light Collection, was inspired by the notion to furnish a luxury residence of architectural distinction with a collection of lights that work in harmony with exquisite furnishings, carefully chosen colour palettes and immaculate décor.

Taking references from the classic architecture of London squares and facades, the linear nature of the pieces reflect elegant lines of columns and arches replicated throughout Palladian Georgian terraces and iconic squares.

These terraces and squares that surround the CTO studio and showroom in London have provided constant inspiration from the sheer symmetry of the flawless architectural stone carvings and metal railings.

made to order

Our exclusive lighting illuminates some of the world's most luxurious residential and commercial interiors and is made to order in our factory in the UK. We are experienced in advising clients on their design needs and collaborate extensively with interior designers and architects. We believe the best way to experience our lighting collection is by visiting our showroom. Based on our existing designs, our lights can be customised to create site-specific pieces. From unique showstoppers to discreet lighting solutions, CTO Lighting's designs feature in high profile projects across the globe.
